SUBJECT: FCC E911 REQUIREMENTS PER §22.921

Gentlemen:

Samsung Electronics Co., Ltd. hereby certifies that the analog cellular telephone (FCC ID: A3LSCHN393), using the Automatic A/B Roaming– Intelligent Retry method, meets the E911 requirements specified in Section 22.921 of the FCC Rules. This procedure recognizes when a "9-1-1" call is made and, at such time, will override any programming in the mobile unit that determines the handling of a non-911 call and permit the call to be handled by other analog carriers.

Should you have any questions or comments concerning the above, please contact the undersigned.

Sincerely,

A handwritten signature in black ink, appearing to read "Wallace Oh".

Wallace Oh

In re: Samsung Electronics Co., Ltd.
FCC ID.: A3LSCHN393
Request for Confidentiality

To Whom It May Concern:

In accordance with 0.459 of CFR 47, Samsung Electronics Co., Ltd. requests confidentiality for the Block Diagram, Schematics, Parts list, Tune-up Procedure, Operational and Circuit Description of the attached test report.

These documents contain detailed system and equipment descriptions and related information about the product, which Samsung Electronics Co., Ltd. considers to be proprietary, confidential, and a custom design and otherwise, would not release to the general public. Since this design is a basis from which future technological products will evolve, Samsung feels that this information would be of benefit to its competitors, and that the disclosure of the information in these documents would give our competitors an unfair advantage in the market.

Sincerely,

A handwritten signature in black ink that reads "Wallace Oh".

Wallace Oh
