Dear Mr. Gregory Czumak,

The reply to your question is as follows :

1. The Operational Description lists Class 12 operation, however, body SAR was only tested in single transmission slot mode. Please provide body SAR data in multi-transmission mode, or else verify that multi-lot transmission mode operation has been disabled in the EUT.

==> We confirm that multi-lot transmission mode operation has been disabled in the EUT.

2. The Operational Description lists 850MHz operation as well as EDGE operation. Please verify that these have been disabled in the EUT.

==> We confirm that those have been disabled in the EUT.

3. The user's manual lists an FM Transmitter as an accessory. Please describe this transmitter- has it received FCC authorization?

==> Please find attached the amended User's manual.

Thank you.

Best Regards
Geoffrey
