Hi, Jenny,

Please address following issues.

Q#1: According to the user manual, for example, page 115 indicates that this camera has supported Ad-Hoc mode. Please then provide an attestation letter to state that it will not Ad-Hoc on non-USA frequency bands. Only 11 channels are available when using in the State. → Please find attached letter.

Q#2: Does this device support any body-worn configuration? Can it transmit when taking photos at the position of held to face? If it is available, then SAR evaluation may be required.

→ No, it's not possible to transmit during taking photo at the position of held to face.

Q#3: Please check the period of short term confidentiality request is. 45 days or 180 days or etc..

→ Please apply 180days of short-term confidentiality.

Q#4: For IC filing, according to RSS-102 Issue 4, user manual is required to provided related RF exposure statements for user instruction. Please address.

→ Please find attached user manual. Since 1 and 2 part of user manual doesn't have change, I only attached third part of user manual. You can find RF exposure statement on page 128.

Best Regards,
Lucy Tsai/UL CCS
