

OPERATION DESCRIPTION

1. SRC-S401RF/A

When the button is pressed, the battery applies 3V DC. And the Micom is wake up, then The LED (under marking 'DIREC TV') action will be shown. At the same time RF source signal from Micom pin #20 is oscillated to Q1(RF module's Q1) by 418MHz saw resonator. e.g) ASK Modulation. And finally modulated signal is amplified through Q2 (power amplifier) then radiated to Antenna at air.
