

**AFFIDAVIT FOR ESN PROTECTION
OF CELLULAR MOBILE TELEPHONES**

We hereby certify that the LGE Handheld Portable Cellular Telephone(**FCC ID: BEJBD6070**) is so designed that it complies with all the requirements for ESN protection specified in section 22.919 of the FCC Rules.

- A) The transmitter in service has a unique ESN.
- B) The ESN host component is permanently attached to a main circuit board of the mobile transmitter and the integrity of the unit operating software cannot be altered. The ESN is plated from fraudulent contact and tampering. The ESN is encoded using multiplication by a polynomial and the ESN data programmed in the memory with other information.
- C) The ESN is factory-set and cannot be altered, transferred, removed or otherwise able to be manipulated. Cellular mobile equipment is specifically designed such that any attempt to remove, tamper with, or change the ESN chip, its logic system, or firmware originally programmed by the manufacturer will render the mobile transmitter inoperative.

Sincerely,

Subject : LG Electronics Inc..
FCC ID: BEJBD6070
FCC E911 Requirements Per 522.921

Gentlemen:

LG Electronics, Inc. hereby certifies that the analog cellular telephone(FCC ID : BEJBD6070), using the Automatic A/B Roaming-intelligent Retry method, meets the E911 requirements specified in Section 522.921 of the FCC Rules, This procedure recognizes when a "9-1-1" call is made and, at such time, will override any programming in the mobile unit that determines the handling of a non-911 call and permit the call to be handled by other analog carriers.

Should you any have questions or comments concerned the above, please contact the undersigned.

Sincerely,

E.S.Park
