**SUBJECT: LG Electronics Inc.
FCC ID: BEJDB525
731 Confirmation No.: EA101991
Correspondence Reference No.: 20731
Request for Tech. Info.: 08/25/2001**

Dear Joe:

Transmitted herewith, on behalf of LG Electronics Inc., is an amendment in response to the request for technical information dated Sept. 25, 2001.

1. Please find attached the cover letter for BEJDB525.
2. Please find attached the revised PCS EIRP data pages.
3. Per your request the Hand SAR will not be submitted.
4. Please note that we have not received our glycol Proof SAM Phantom and that a high conductivity is on the side of caution and leads to an over estimation of SAR.
5. Please find attached RF Warning Statement, which will be located in the front of the manual.
6. Please find attached the data of the right side.
7. We would like to confirm the thickness of the Flat phantom section to be 4mm. Please note that this thickness is compensated for by the software.
8. Please find attached SAR data on channel 799 with antenna in and out. The new levels are within 10% of the original measurement.

We trust this information is sufficient to issue the grant as soon as possible. If you have any further questions, please do not hesitate to contact us.

Randy Ortanez
President
