Phone Components & Features

Phone Components & Features

- Easy-to-read LCD screen with status icons.
- Messaging, voicemail, and caller ID.
- Speakerphone feature.
- Menu-driven interface with prompts for easy operation and configuration.
- Any Key answer, Auto Redial and Speed Dials (with 9 locations).
- Bilingual (English and Spanish) capabilities.
- Internal Antenna.

Display

Standby mode is when you are not on a call or using a menu. You must be in Standby mode to enter a phone number to dial.

Installing the SIM and Battery

Installing the SIM card

Slide the SIM card into the SIM card holder. Make sure that the gold contact area on the card is facing downwards (as shown below). To remove the SIM card, pull it gently in the reverse direction.

Installing the Battery

1. To install the battery, align the battery contacts (1) with those in the battery compartment. Press the battery down until it clicks into place (2).
2. With the battery in position in the phone, replace the battery cover on the back of your phone.

Installing the SIM and Battery

Removing the Battery

1. With your phone turned off, push the button above the battery cover in (1) and lift off the battery cover to remove it.

2. Lift the battery up (1) and away (2) from the phone, as shown.

WARNING: Do not remove the battery when the phone is switched on, as this may damage the phone.

Changing the display language

Allows you to use the bilingual feature according to your preference. Choose between English and Spanish.

1. In Standby mode, press the Left soft key **Menu**.
2. Press **V** → **H** → **T**.
3. Use **Navigation** to highlight **Automatic, English or, Español**, then press **Select**.

Making Callsx

1. Make sure the phone is turned on.
2. Enter the phone number (include the area code if needed).
3. Press **Call** to dial.
4. Press **End** to end the call.

Recent Calls

The Recent Calls menu displays a list of the last phone numbers or Contacts entries for calls missed, received, or dialed. It is continually updated as new numbers are added to the beginning of the list and the oldest entries are removed from the bottom of the list.

Note: To view a quick list of all your recent calls, press **Call** Key while in standby mode.

1. All Calls : Allows you to view the list of the most recent missed, received and dialed calls.
Press the Left Soft Key **Menu**, **F**, **R**, **R**.

Installing the SIM and Battery

Charging your phone

Pull out the cover of the charger slot on the top left side of your LG910G. Plug in the charger, making sure that the 'B' side is facing you (as displayed below), and plug the other end into a wall socket. Your LG910G will need to be charged until a message reading “Battery full” appears on screen.

2. Missed Calls : Allows you to view a list of the most recent missed calls.
Press the Left Soft Key **Menu**, **F**, **T** → Use **Navigation** to highlight an entry.
3. Received Calls : Allows you to view a list of the most recent received calls.
Press the Left Soft Key **Menu**, **F**, **Y** → Use **Navigation** to highlight an entry.
4. Dialed Numbers : Allows you to view a list of the most recent dialed calls.
Press the Left Soft Key **Menu**, **F**, **F** → Use **Navigation** to highlight an entry.
5. Call Duration : Allows you to view the duration of the calls, by type.
Press the Left Soft Key **Menu**, **F**, **G** → Use **Navigation** to highlight one of the call **types** (below).
All Calls/ Dialed Calls/ Received Calls/ Last Call

Sound

Options to customize your phone's sounds:

Ringers

1. Press the Left Soft Key **Menu**, **G**, **Y**.
2. Use **Navigation** to highlight the ringtone among Ringtone, Voice Recordings or Default Sounds folder.
3. Press **Play** to play the ringtone, or press the Left soft key **Options** and select **Use As** to set the ringtone to your phone.

Sound

-   .
- Use  to highlight **Normal/Silent/Outdoor/ Flight Mode/ Meet-ing Mode/Customise 1/Customise 2/Customise 3**, press the Left Soft Key  **Options**, and choose **Edit**.
- Use  to highlight the volume function and use  to adjust the volume, then press the Right soft key  **Done** to save the setting.

Using the menus

Selecting or Modifying a Menu or Feature :

- Press the Left soft key  **Menu** to access the Main menu.
- Use the Navigation keys  to reach a desired menu and then press the  key.
- If the menu contains any submenus, locate the one you want by using the Navigation keys . Press the  key to enter the submenu.

If the selected menu contains additional submenus, repeat this step.

Entering text

In a text input field, press the  key to toggle between capitalization. To switch between **123** and **Abc** modes, press the  key. To access Symbols, press  and select the desired symbols.

Using ABC mode

Press the keys labeled with the letter you want.

Using 123 mode

Press the keys that correspond with the digits you want to enter.

Tips for entering text

- To move the cursor, use the navigation keys .
- To delete characters one by one, press the Clear key . To delete all of the characters, press and hold the Clear key .
- To insert a space between characters, press .

Sending an SMS message

Allows you to send text and email messages.

- Press the Left soft key   and .
- Search for and enter a recipient.
Press  Add to enter a phone number or email address not in your Contact List.
- Enter your message.
- Press  **Send** to send the message.

Quick feature reference

This section provides instructions on how to access some of your phone's features (Not all options are listed below).

Menu	Description
 	For more information about the Prepaid menu, please refer to the Quick Activation Guide.
  	Add New allows you to add a new contact to your Contact List.
  	Settings allows you to configure settings for Contacts.
  	Groups allows you to view your grouped Contacts, add new group, change the name of a group, or delete a whole group.
  	Speed Dials allows you to view your Speed Dials list, designate new Speed Dials, or remove Speed Dial designations entered in your Contacts.
  	Allows you to check your own number.
  	My Business Card allows you to view, enter and edit more of your personal Contact information, including name and phone numbers. You can also send this Business Card via Text or Multimedia message, or Bluetooth.
  	Create New Message allows you to send text and e-mail messages.
  	Inbox allows you to view your received messages.
  	Drafts allows you to view your saved (message) Drafts.
  	Outbox allows you to view your sending or failed essages.
  	Sent Items allows you to view your sent messages. Access to view contents of sent messages and verify whether the transmission was successful.

Menu	Description
  	Saved Items allows you to view saved message, text templates or multimedia templates.
  	Emoticons allows you to edit, delete, and add emoticons to your emoticons list.
  	Settings allows you to configure settings for Messaging.
  	All Calls allows you to view the list of the most recent missed, dialed, and received calls.
  	Missed Calls allows you to view the list of the most recent missed calls.
  	Received Calls allows you to view the list of the most recent received calls.
  	Dialed Calls allows you to view the list of the most recent dialed calls.
  	Call Duration allows you to view the duration of calls by call type.
  	Allows you to check packet data counter.
  	Allows you to check my memory card.
  	Allows you to buy graphics, check default images and taken pictures.
  	Allows you to buy ringtones, check default ringtone, voice recordings or default sounds.
  	Allows you to check videos saved in phone.
  	Allows you to check other files save in phone.
  	Allows you to take pictures.
  	Allows you to take videos.
  	Allows you to play music.

Menu	Description
  	Allows you to record voice.
  	Allows you to buy games, play preloaded games.
  	Alarms allows you to set up to five alarms. At the alarm time, any set alarm will sound (depending on your Master Volume settings) the tone of your choice, and an alarm message will be displayed on the LCD screen.
  	Calendar allows you to access your Calendar appointments. Simply enter your appointments in the Calendar, and your phone can alert you with a reminder.
  	Allows you to add to do list as a schedule.
  	Allows you to add, read, edit and erase notes.
  	Allows you to check secret notes. Default code is 0000.
  	Calculator allows you to perform simple mathematical calculations.
  	Stopwatch allows you to use your phone as a stopwatch.
  	Allows you to find date.
  	Converter allows you to convert units of Currency, Surface, Length, Weight, Temperature, Volume and Velocity.
  	World Time allows you to determine the current time in nother time zone or city.
  	Allows you quick access to your favorite menus.
  	Settings allows you to configure settings for Calendar.
  	Allow you to configure profiles settings.

Menu	Description
  	Allows you to configure display settings.
  	Allows you to configure date & time.
  	Allows you to configure connectivity.
  	Allows you to configure call settings.
  	Allows you to configure phone settings.
  	Allows you to configure security settings.
  	Allows you to configure memory info.
  	Allows you to configure restore factory settings.
  	Allows you to connect home browser.
  	Allows you to check bookmarks.
  	Allows you to use facebook.
  	Allows you to use twitter.
  	Allows you to connect with friends and family using scraps and instant messaging.
  	Allows you to check last web address.
  	Allows you to configure web settings.
  	Allows you to enter url and connect new web address.
	Allows you to check saved web pages.

Part 15.21 statement

" Change or Modifications that are not expressly approved by the manufacturer could void the user's authority to operate the equipment. "

Part 15.105 statement

This equipment has been tested and found to comply with the limits for a class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. if this equipment does cause harmful interference or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Part 15 Class B Compliance

This device and its accessories comply with part15 of FCC rules.

Operation is subject to the following two conditions:

- (1) This device & its accessories may not cause harmful interference.
- (2) This device & its accessories must accept any interference received,
including interference that may cause undesired operation.

Body-worn Operation

This USB modem has been tested for typical body-worn operations
with the distance of 0.79inches (2.0cm) from the user's body.

To comply with FCC RF exposure requirements, a minimum separation distance
of 0.79inches(2.0cm) must be maintained from the user's body.

For example, this device must be maintained from the user's body
with an appropriatebelt-clip accessory.[More than 0.79inches(2.0cm)]

Additionally, Belt clips, holsters & other body-worn accessories
may not contain metallic components.

FCC Hearing-Aid Compatibility (HAC) Regulations for Wireless Devices

On July 10, 2003, the U.S. Federal Communications Commission (FCC) Report and Order in WT Docket 01-309 modified the exception of wireless phones under the Hearing Aid Compatibility Act of 1988 (HAC Act) to require digital wireless phones be compatible with hearing-aids. The intent of the HAC Act is to ensure reasonable access to telecommunications services for persons with hearing disabilities.

While some wireless phones are used near some hearing devices (hearing aids and cochlear implants), users may detect a buzzing, humming, or whining noise. Some hearing devices are more immune than others to this interference noise, and phones also vary in the amount of interference they generate.

The wireless telephone industry has developed a rating system for wireless phones, to assist hearing device users to find phones that may be compatible with their hearing devices. Not all phones have been rated. Phones that are rated have the rating on their box or a label located on the box.

The ratings are not guarantees. Results will vary depending on the user's hearing device and hearing loss. If your hearing device happens to be vulnerable to interference, you may not be able to use a rated phone successfully. Trying out the phone with your hearing device is the best way to evaluate it for your personal needs.

M-Ratings: Phones rated M3 or M4 meet FCC requirements and are likely to generate less interference to hearing devices than phones that are not labeled. M4 is the better/higher of the two ratings.

T-Ratings: Phones rated T3 or T4 meet FCC requirements and are likely to generate less interference to hearing devices than phones that are not labeled. T4 is the better/ higher of the two ratings.

Hearing devices may also be rated. Your hearing device manufacturer or hearing health professional may help you find this rating. Higher ratings mean that the hearing device is relatively immune to interference noise. The hearing aid and wireless phone rating values are then added together. A sum of 5 is considered acceptable for normal use. A sum of 6 is considered for best use.

In the example to the left, if a hearing aid meets the M2 level rating and the wireless phone meets the M3 level rating, the sum of the two values equal M5. This should provide the hearing aid user with “normal usage” while using their hearing aid with the particular wireless phone. “Normal usage” in this context is defined as a signal quality that’s acceptable for normal operation.

The M mark is intended to be synonymous with the U mark. The T mark is intended to be synonymous with the UT mark. The M and T marks are recommended by the Alliance for Telecommunications Industries Solutions (ATIS). The U and UT marks are referenced in Section 20.19 of the FCC Rules. The HAC rating and measurement procedure are described in the American National Standards Institute (ANSI) C63.19 standard.

When you're talking on a cell phone, it's recommended that you turn the BT (Bluetooth) mode off for HAC.

HAC statement regarding Multiband

This phone has been tested and rated for use with hearing aids for some of the wireless technologies that it uses.

However, there may be some newer wireless technologies used in this phone that have not been tested yet for use with hearing aids.

It is important to try the different features of this phone thoroughly and in different locations, using your hearing aid or cochlear implant, to determine if you hear any interfering noise.

Consult your service provider or the manufacturer of this phone for information on hearing aid compatibility.

If you have questions about return or exchange policies, consult your service provider or phone retailer.
