FCC ID: BEJLSP300
731 Confirmation No.: EA101928
Correspondence Reference No.: 20750
Request for Tech. Info.: 09/26/2001**

Dear Joe:

Transmitted herewith, on behalf of LG Electronics Inc., is an amendment in response to the request for technical information dated September 26, 2001.

1. Please find the attached revised cover letter stating the correct maximum SAR level of 1.0287 W/kg.
2. We used a conductivity value of 1.1 S/m, which is higher than the one listed in supplement C. This is an overestimation and will lead to a higher SAR value.
3. Please find the attached RF warning statement.
4. Please find the attached operational description and the revised page 1 of the test report with the correct maximum power. Please find the revised compliance statement indicating the correct power rating of .231 W ERP. Please find the revised page 42 of the user's manual indicating the proper conducted value of 23.0 dBm.

We trust this information is sufficient to issue the grant as soon as possible. If you have any further questions, please do not hesitate to contact us.

Randy Ortanez
President
