**SUBJECT: LG Electronics Inc.
FCC ID: BEJLST250
731 Confirmation No.: EA101951
Correspondence Reference No.: 20753
Request for Tech. Info.: 09/26/2001**

Dear Joe

Transmitted herewith, on behalf of LG Electronics Inc., is an amendment provided in response to the request for technical information dated September 26, 2001.

1. We used a value of 1.1 S/m, which has a higher conductivity than the 0.97 value of the new standard. The value is on the side of caution, which produces an overestimation of SAR.
2. Please find attached the following
 - a. The revised Operational description
 - b. The revised Users Manual.
 - c. The revised Test Report (Pages 1&2).
3. Please find attach a clearer version of the schematics.
4. Please find attached the correct SAR Plots for Model: LST-250.
5. In regards to Tim's email, please find attached the Z Scan liquid depth data.

We trust this information is sufficient to issue the grant as soon as possible. If you have any further questions, please do not hesitate to contact us.

Randy Ortanez
