RE: FCC ID: BEJLST280_ATCB004571
Attention: Jay Kim

I have a few comments on this Application. Please note that further comments may arise in response to answers provided to the questions below.

1. Please note that as the signature on the 731 form is not that of the grantee, you will have to provide an authorization letter from the grantee. Please provide the power or attorney for Estech to act as agent for this application.
2. FYI - Please note that when the FCC ID number is 'boxed' in, the entire statement should be in the box. This means that instead of BEJLS280 alone FCCID:BEJLS280 should be in the box.
3. Please note that the first plot on page 11 appears to show part of the signal at the band edge 824MHz to be over the limit, but the data recorded in the table on page 10 says the level is 1.4dB

under the limit. See the line in the following section of the plot --- While this may be a plot resolution (not res BW resolution) issue, the signal does still appear to be over the limit. Please explain.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
