Subject: Request for additional information

In regards to your recent TCB application referenced above, we kindly request that you provide the following additional information.

1. Can the EUT connect to a pc (the operational description references a serial interface and a high speed SSC interface)? If it can, then it is also a pc peripheral subject to either certification of DoC. If you choose certification, then a Part 15B test report must be submitted.

--> This device isn't connected to a PC. So, we don't need to test Part 15B.

2. The DC Power Supply, on p.23/25 of the EMC report, is listed as past its cal due date. Please address.

--> Please see the attached report.

The items indicated above must be submitted before processing can continue on the above referenced application.

Sincerely,

Gregory Czumak
Senior Certification Engineer
Quality Manager
