SUBJECT: LG Electronics, Inc.
FCC ID: BEJWX8300
731 Confirmation No.: TC208777
Correspondence Reference No.: 28136
Request for Tech. Info.: 04/24/2006

Dear Martin:

Transmitted herewith, on behalf of **LG Electronics, Inc.** is an amendment provided in response to the request for technical information dated April 24, 2006.

- A. The phone was retested using Agilent 8960 base station simulator in accordance with the May 9th, SAR Measurement Procedures for 3G Devices. The revised SAR report is attached. The applicant agrees to accept the original SAR values on the Grant of Authorization.
- B. The powers listed on page 18 of the new SAR report are average powers.
- C. A crest factor of 1:1 was used because the measurement procedure requires RC3/ SO55 for Head SAR and TDSO/ SO32 for Body SAR.
- D. The May SAR measurement procedure was used for the SAR testing.
- E. The EV-DO Rev 0 Phone does not support simultaneous voice and data. Power tables are included in the SAR report.

We trust this information is sufficient to resolve FCC questions in this application. If you have any further questions, please do not hesitate to contact us.

Randy Ortanez
President
