ATTESTATION for Rocket 5AC PRISM, IC ID: 6545A-R5ACP

To Whom It May Concern:

This letter serves as a formal declaration that per Industry Canada standards the frequency range 5600 – 5650MHz (TDWR) will not operate in the Rocket 5AC PRISM. The Rocket 5AC PRISM is a professional install only and at the first initial power on the web interface instructs the installer to select a country of operation before access is granted to the configuration. Once the country is selected then all the regulatory requirements for that country are enabled and cannot be changed. Once in the web interface configuration the only available frequency ranges will be the regulatory compliant frequencies.

Please contact me if there is any information you may need.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Michael Taylor', with a stylized flourish at the end.
