| ⑩ camera flash | ⑪ microphone | ⑫ TF+Nano SIM card slot |
| ⑬ Touch Button | ⑭ Pogo Pin | |

Packaging Contents

Stylus Pen

Replace the pen nib

1. Use a pen clip to clamp the old nib (ink cartridge/pen core) and pull it out from the capacitive stylus.

2. Hold the new pen nib with your hand, align it with the nib tube, and slowly push it into the capacitive stylus. Please make sure to push it all the way in to prevent the nib from falling out during use.

Attention:

1. Please use or purchase the standard capacitive stylus provided by this manufacturer.
2. Using other non-standard capacitive styluses may lead to compatibility issues and may also cause damage to the product. Damage under such circumstances is not covered by the free warranty.
3. The Bigme capacitive stylus is a pressure-sensitive one. The pen tip can be replaced with the accompanying tool after wear. Do not rotate or disassemble the pen body at the seam. Please avoid such operations.

Safety Usage Guide

Installation method for 'Bigme Cloud' APP

1. New device: Power on and start up -- Connect to WIFI -- Scan the QR code on the login/registration interface -- Download and install the "Bigme Cloud" APP.
2. On the note list interface -- Long press one of the note options -- Click the "Bigme Cloud" button on the top right corner to generate a download QR code -- Scan the code to download and install the "Bigme Cloud" APP.
3. Scan the QR code below to download and install the "Bigme Cloud" APP.

Note: The account password for the "Cloud Read-Write" is consistent with that for the Bigme smart notebook.

Instructions for use

- How to power on/off the device:
1. When the device is powered off, press and hold the power button for 5 seconds to start the device.
 2. Press and hold the power button for 1 second, and a shutdown dialog box will pop up. You can choose to shut down or restart the device.
 3. The device supports automatic sleep mode. You can set the time for it to enter sleep mode on your own. A short press of the power button can switch between sleep and wake modes.
 4. In an abnormal state, pressing and holding the power button for 12 seconds can force a reset and restart the device.

How to charge:

1. Please use a certified 5V = 3A power adapter for charging.
2. Connect the device to a computer's USB port using the standard data cable for charging.
3. During charging, the white indicator light stays on constantly, and it turns off when the device is fully charged.
4. The charging process takes approximately 2.5 hours to complete.

How to transmit (transfer) data:

1. Connect the device to a computer via a USB data cable for transmission.
2. Sync and transmit data through the Bigme Cloud APP.

How to transfer books via Wi-Fi:

1. Open the "Bookshelf" app, click "Import" in the upper right corner of the page, and then select "Wi-Fi Import".
2. Within the same local area network, enter the pop-up website address in the computer's browser.
3. Select a local file to import and upload it.

How to perform OTA upgrade:

- Enter "Settings" - "System Update" - "Check for Updates" - then proceed to "OTA Online Upgrade".
- Note: Please ensure that the device battery level is above 30% before starting the upgrade.

How to protect the device:

1. Try to use a leather case during daily use to prevent the screen from direct impacts and squeezing.
2. Avoid placing heavy objects on top of the smart office tablet when storing it.
3. Keep it away from all kinds of liquids.

5.2 GHz band is restricted to indoor use only

Note

- 1.The maximum operating temperature of the product is 45 °C;
- 2.If the wrong model of battery pack is used for replacement, there is a risk of fire or explosion;
- 3.Do not place the battery pack in extremely high temperature or lowpressure environments,or mechanically squeeze or cut the battery pack,which may cause explosions or leakage of flammable liquids or gases;
- 4.This product is not sold with a power adapter.If a power adapter is usedfor power supply, a power adapter that has obtained certification andmeets standard requirements should be used.

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
 - Increase the separation between the equipment and receiver.
 - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
 - Consult the dealer or an experienced radio/TV technician for help.
- To assure continued compliance, any changes or modifications not expressly approved by the party.

Responsible for compliance could void the user's authority to operate this equipment. (Example- use only shielded interface cables when connecting to computer or peripheral devices).

This equipment complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference thatmay cause undesired operation.

Specific Absorption Rate (SAR) information: This device meets the government's requirements for exposure to radio waves. The guidelines are based on standards that were developed by in dependent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons regardless of age or health. FCC RF Exposure Information and Statement the SAR limit of USA (FCC) is 1.6 W/kg averaged over one gram of tissue. Device types: device has also been tested against this SAR limit. This device was tested for typical body-worn operations with the back of the Tablet computer kept 0mm from the body. To maintain compliance with FCC RF exposure requirements, use accessories that maintain an 0mm separation distance between the user's body and the back of the Tablet computer. The use of belt clips, holsters and similar accessories should not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with FCC RF Exposure requirements, and should be avoided
