Subject: Confidentiality Request for Exhibits under FCC ID: 2AC20-CHU200TW

To Whom It May Concern:

Pursuant of Section 0.457 and 0.459 of the Commission's Rules and KDB 726920 D01 Confidentiality Request Procedures, we hereby request that the exhibits listed below,

submitted in support of the certification application for FCC ID: 2AC20-CHU200TW, be withheld permanently from public disclosure:

- Schematics
- Block Diagram
- Operational Description
- Internal Photographs

The above exhibits, owned solely by Windcave, contain trade secrets and proprietary information which is not routinely available to the public or to our competitors. The public disclosure of these materials may be harmful to the applicant and provide unjustified benefits to its competitors.

Confidentiality of the internal photographs is specifically sought because the device could be re-engineered from the photographs.

Windcave controls information about and access to the device as follows:

- The schematics, internal photographs and the like are only used internally by Windcave or by those 3rd parties as are required to complete product testing. Windcave staff are subject to confidentiality obligations under their employment agreements. Third parties completing product testing are subject to NDAs or equivalent confidentiality obligations in their terms of service.
- Internal photographs are not made available to customers or end users. Sales of these devices to customers or resellers are subject to customer and reseller agreements which contain confidentiality obligations prohibiting reverse engineering and restricting the disclosure of proprietary information.
- User manuals do not include schematics, internal photographs, detailed descriptions of device operation or detailed block diagrams. User manuals are provided to customers and resellers, and are not confidential in nature.
- To meet strict Payment Card Industry (www.pcisecuritystandards.org) security requirements, the devices include security mechanisms which disable the device if it is opened and prevent the modification of the firmware by the user.
- The PCI Security Standards require that all devices are returned to Windcave Ltd. at their end of life. Therefore Section 7.6 of the Windcave Customer Contract states:
"Consequences of termination: On the termination of this Agreement, you must immediately:
a) return all Windcave Products to Windcave..."

The applicant understands that pursuant to Section 0.457 of the Rules, disclosure of this application and all accompanying documentation will not be made before the date of the Grant for this application.

Yours sincerely

Cameron Collard
