USER MANUAL

取扱説明書

Overview

USB-C Port

Wireless Charging Area

Stand

Cooling Vent

Function Button / Indicator Light

In order to bring you a better experience, please read this user manual carefully before using this product and keep it properly for future reference.

Instructions

1. Plug in the charging cable and connect to power. Attach the wireless charger magnetically to the back of your phone to start fast wireless charging. The cooling fan turns on by default. When plugged in and on standby, the fan remains off.

Note: In case of charging abnormalities (5V or QC input), the white indicator light on the function button will keep flashing.

2. Press and hold the function button for 3 seconds to turn off the fan. When the phone is reattached magnetically, the cooling fan will automatically turn back on.

3. Unfold the stand to support both portrait and landscape charging.

① Portrait mode: convenient for video calls or chatting.

② Landscape mode: ideal for watching shows or online classes.

4. The stand supports 360° and 120° free rotation, allowing hands-free use.

5. When not in use, fold the stand and place the product in your pocket or bag for easy carrying during outings, business trips, or travel.

6. Note the charging detection distance, and avoid using too thick phone cases.

The vertical distance between the internal sensing coil of the phone and the wireless charger must be within about 3mm for charging to occur. For the best wireless charging experience, please avoid using phone cases thicker than 2mm or non-magnetic cases, as they may affect charging efficiency.

7. Warning: Charging is not supported when metal objects, magnets, or credit cards interfere. Please remove them before charging!

Specifications

Product Name	Wireless Charger
Product Mode	WX8
Input	9V ⚡ 3A/12V ⚡ 3A/15V ⚡ 3A
Output	25W MAX
Charge Sensing Distance	≈3mm
Working Temperature	0°C-35°C/32°F - 95°F
Package Contents	Wireless Charger ×1, Charger(Optional) ×1, Charging Cable ×1, User Manual ×1

The parameters above are derived from tests conducted in the TORRAS laboratory. Actual performance may vary due to production processes and other factors. The images shown are for reference only. Actual products may vary depending on the purchased version.

Important Safety Instructions

1. This product is only suitable for iPhone12 and above models, not for charging other brand products.

2. Please make sure your phone supports wireless charging, otherwise it will not be able to charge.

3. Do not use a case that is more than 2mm thick or it will not charge.

4. Do not place any foreign objects between your phone and the wireless charger's surface, including metal plates on a car mount, credit cards, keys, coins, metal objects, or NFC cards, which will make wireless charging fail or cause overheating.

5. Do not disassemble, hit, crush or throw it into fire. Incorrect reassembly may result in fire or make a risk of injury.

6. Do not use this product under severe high temperature, humidity or corrosive conditions to avoid damaging the circuitry with leakage.

7. Do not spill water or other liquids on the wireless charger. If you need to clean it, please make sure the power is disconnected.

8. When charging, please keep the distance between the wireless charger and the implanted medical device (pacemaker, cochlear implant, etc.) at least 30cm to avoid potential interference with the medical device.

9. When using a charger block for power supply, please purchase or use a charger that has obtained certification and meets the standard requirements.

10. Use of power cords or chargers other than those recommended or sold by the manufacturer of this product may result in a risk of fire or personal injury.

11. This product requires a USB-C PD fast charger block with a minimum output of 45W.

12. High temperatures can reduce charging speed and limit power, which is a common issue with all wireless chargers. It is recommended to charge your device in environments with temperatures below 25°C / 77°F.

13. The phone case and the position of your device on the wireless charger will affect the charging speed. The further the device is from the center of the wireless charger, the slower the charging speed will be.

14. For optimal charging performance, align your smartphone with the coil in the center of the wireless charger. If the charging icon does not appear on your smartphone, adjust its placement. Ensure the smartphone is always centered on the wireless charger.

15. The product may become warm during charging. It is a normal phenomenon, no need to worry. If overheating occurs, please pause use.

16. Improper use, dropping or excessive force may cause damage to this product.

17. Do not use harmful chemicals or detergents to clean this product.

18. Please store this product in a cool and dry place, do not store this product in a hot or humid environment.

19. Keep this product out of reach of children.

FCC

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-- Reorient or relocate the receiving antenna.

-- Increase the separation between the equipment and receiver.

-- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-- Consult the dealer or an experienced radio/TV technician for help

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC RF Radiation Exposure Statement:

1. This Transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

2. This equipment complies with RF radiation exposure limits set forth for an uncontrolled environment.

3. This equipment should be installed and operated with minimum distance 0cm between the radiator and your body.

All products bearing this symbol are waste electrical and electronic equipment which should not be mixed with unsorted household waste. Instead, you should protect human health and the environment by handing over your waste equipment to a designated collection point for the recycling of waste electrical and electronic equipment, appointed by the government or local authorities. Correct disposal and recycling will help prevent potential negative consequences to the environment and human health. Please contact the installer or local authorities for more information about the location as well as terms and conditions of such collection points.
