

Antenna Gain Explanation

FCC ID: 2AQI5-WM701

Product Name: Wireless Car Charger

Model No.: WM701

This document is provided to explain the antenna gain information for the above-mentioned device.

The fundamental emission test was performed using the radiated measurement method. Under this test setup, the antenna gain has already been taken into account in the measured result. Therefore, separate antenna gain information is not required for the fundamental emission evaluation.

For the antenna structure and related details, please refer to the document "Operational Description_Antenna specification".

If there are any questions, please feel free to contact us.

Signature

A handwritten signature in black ink, appearing to read 'Chi Yang', written in a cursive style.

Printed name: Chi Yang
