

The image shows the internal components of a portable DVD player. A green printed circuit board (PCB) is visible, populated with several integrated circuits and components. Key components include a MediaTek MT2000 chip, a Winbond W25Q64BV memory chip, and a Realtek RTL8150 chip. The board is labeled with 'Z04-N300-V01' and '12-12+'. Various connectors are visible, including a USB port, a FireWire port, and a multi-pin connector. The board is housed within a black plastic casing, which is partially open, revealing the internal components.
