

Limitation of Wireless Functions

Date: January 6, 2026

American Certification Body, Inc.
313 Park Avenue
Suite 300
Falls Church, VA 22046

To Whom It May Concern:

Subject: Declaration of Supported Wireless Technologies of Device Under Test (DUT)

Holoindustry Kft. hereby declare that although the antenna specification used in the Device Under Test (DUT) indicates support for multiple wireless technologies, the actual radio functions implemented and enabled in the DUT are strictly limited, as detailed below.

Device Under Test (DUT)

Sample Description : Mixed reality goggles
Model No. : TGEGEN1

Antenna Capability

The antenna installed in the DUT is a **wideband antenna** designed to support:

- WLAN 2.4 GHz / 5 GHz / 6 GHz
- Bluetooth
- Zigbee

Actual DUT Wireless Operation

The DUT **only supports and operates with the following wireless technologies:**

- **WLAN 2.4 GHz**
- **Bluetooth**

Unsupported and Disabled Technologies

The following radio technologies are **not supported** by the DUT:

- WLAN 5 GHz
- WLAN 6 GHz
- Zigbee

The unsupported wireless bands and technologies listed above are:

- **Not implemented in the RF hardware**, and/or
- **Permanently disabled at the firmware level**

These radio functions **cannot be activated**, enabled, or modified by:

- End users
- Professional installers
- Firmware upgrades
- Software configuration or third-party tools

The DUT **does not support any software-defined radio (SDR) functionality** that could alter its certified operating bands or modes

Only the wireless functions declared above are available during normal operation, compliance testing, and in the final released product.

Thank you,

By:
