[Important Safety Instructions]

1. Do not exert excess force on the product.
 2. Do not disassemble the product or let it come into direct contact with heat or water.
 3. Be careful when using the product in a hot or humid environment as it may damage the circuit.
 4. A magnet may cause the product to break or malfunction; do not place magnet Chip card (e.g. ID cards, credit cards) near the product.
 5. Medical devices(e.g. pulse measuring device, hearing aid) may indirectly interfere with the product; keep them at least 20cm away from the product.
 6. Keep away from children.
 7. Please use the magnetic case on the mobile phone
- *The product image herein is provided as an example and user's guide for the portable high-speed wireless charger and may differ from the actual product.

[Specification]

Input : 9V/3A

Output : 15W

Color : Black

[warranty period]

1. 12-month limited warranty

English

FCC Statement

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Note: The Grantee is not responsible for any changes or modifications not expressly approved by the party responsible for compliance. such modifications could void the user's authority to operate the equipment.

The device has been evaluated to meet general RF exposure requirement.

To maintain compliance with FCC's RF exposure guidelines, the distance must be at least 20 cm between the radiator and your body, and fully supported by the operating and installation configurations of the transmitter and its antenna(s).
