Aroma Diffuser User Manual

Read all instructions before use this product.

1. Safety Precautions

- Keep the Device Upright**
The device should be kept upright at all times. Do not tilt or drop the device. If the device is tilted or dropped, stop using it immediately and contact customer support.
- Keep Out of Reach of Children**
Do not allow children to play with or use the device. It is not a toy.
- Use Proper Power Source Only**
The device should be used with a power source that is rated at least 1000mA and 12V. Do not use a power source that is not rated for this purpose.
- Keep Away from Fire and Flammable Materials**
Do not use the device near open flames, candles, or other flammable materials. Do not use the device in a room with flammable materials.
- Use Proper Placement of Device**
Do not use the device in a room with high humidity or high temperature. Do not use the device in a room with high dust or high pollen.
- Use the Device Properly**
Do not use the device in a room with high humidity or high temperature. Do not use the device in a room with high dust or high pollen.

2. WARNING

Do not use the device in a room with high humidity or high temperature. Do not use the device in a room with high dust or high pollen.

3. Product Feature

Size: 1000mm * 210mm
Weight: 200g
Capacity: 300ml
Power: 10W
Voltage: 12V
Input: AC100V
Output: DC12V

4. Component Names

5. Operating Instructions

- Check the Water Level**
Before using the device, check the water level in the tank. If the water level is low, add water to the tank.
- Check the Power Source**
Before using the device, check the power source. If the power source is not working, replace it.
- Check the Diffuser Nozzle**
Before using the device, check the diffuser nozzle. If the diffuser nozzle is clogged, clean it.
- Check the Base**
Before using the device, check the base. If the base is not working, replace it.

6. Use Intensity and Working Time

The device has two modes: Low and High. The Low mode is for low intensity and the High mode is for high intensity. The device can be used for up to 10 hours.

7. Maintenance

Do not use the device in a room with high humidity or high temperature. Do not use the device in a room with high dust or high pollen.

8. HVAC Connection Nozzle Description

The HVAC connection nozzle is used to connect the device to the HVAC system. It is used to diffuse the scent into the HVAC system.

9. HVAC System Integration Guide

The device can be used in a room with an HVAC system. The device can be used to diffuse the scent into the HVAC system.

10. Additional Information

The device is not a toy. It is not a toy. It is not a toy.

11. Device Operating Instructions

1. Preparing the Device

- Unbox the device and check the contents.
- Check the water level in the tank.
- Check the power source.
- Check the diffuser nozzle.
- Check the base.

2. Using the Device

- Turn on the device.
- Adjust the intensity.
- Adjust the working time.
- Adjust the diffuser nozzle.
- Adjust the base.

3. Maintenance

- Clean the device.
- Replace the water.
- Replace the power source.
- Replace the diffuser nozzle.
- Replace the base.

12. Warranty Policy

The device is covered by a 1-year warranty. The warranty is for the device and its components.

13. Customer Support

For more information, please contact customer support.

14. Additional Information

The device is not a toy. It is not a toy. It is not a toy.

15. Device Maintenance

The device should be cleaned regularly. The device should be cleaned with a soft cloth.

16. Customer Support

For more information, please contact customer support.

FCC Warning:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
