

We, Autec Srl, declare that:

The radio module FSAACT01A may be configured to operate over the whole 902-928MHz band.

The specific used frequency band will be configured during the manufacturing process (changes for any radio parameter are not allowed and are impossible by any third party).

According to a customers' request, Autec is going to configure this transmitting unit to operate at 915-928 MHz band.

There are no hardware differences between the radio modules configured in the 902-928 MHz band and radio modules in the 915-928 MHz.

Dated this 12th of November 2025
